

## Press release

---

# VALEO PRESENTED ITS GROWTH STRATEGY IN POWERTRAIN ELECTRIFICATION AND AUTONOMOUS VEHICLES AT TODAY'S INVESTOR MEETING IN PARIS.

---

**PARIS, France, September 28, 2016** – In front of more than a hundred investors, Jacques Aschenbroich (Chairman and Chief Executive Officer of Valeo), Christophe Périllat (Chief Operating Officer), Xavier Dupont (President, Powertrain Systems Business Group) and Marc Vrecko (President, Comfort & Driving Assistance Systems Business Group) presented Valeo's growth strategy in the fields of powertrain electrification and autonomous vehicles.

They set out the Group's positioning and the different technologies that will enable Valeo to capitalize on the successive waves of growth expected in these two areas.

Technological innovation – which is more central than ever to the Group's development – and the significant increase in order intake have put Valeo ahead of schedule in terms of the medium-term objectives presented at the Investor Day in March 2015.

The presentations are available on our website at:  
<http://www.valeo.com/en/investors/publications.html>

Valeo is an automotive supplier, partner to all automakers worldwide. As a technology company, Valeo proposes innovative products and systems that contribute to the reduction of CO2 emissions and to the development of intuitive driving. In 2015, the Group generated sales of 14.5 billion euros and invested over 10% of its original equipment sales in Research and Development. Valeo has 148 plants, 19 research centers, 35 development centers and 15 distribution platforms, and employs 88,800 people in 32 countries worldwide.
