

IAA Commercial Vehicles 2018: Valeo's latest innovations at the epicenter of three transportation revolutions

Paris, September 19, 2018 – Valeo is unveiling its latest innovations at the 67th IAA International Motor Show for commercial vehicles (IAA CV 2018) in Hanover. These innovations are at the epicenter of the three revolutions that are disrupting the world of transportation: vehicle electrification, autonomous cars and digital mobility.

Valeo's technologies, namely its innovative and affordable 48 V electrical systems and air conditioning units for buses and coaches, make it possible to reduce CO₂ emissions while also lowering vehicle operating costs.

In autonomous driving, Valeo is adapting its cutting edge technologies to the needs of all stakeholders in the world of transportation. One example on display at the Hanover motor show is its Solid State LiDAR solution, a key enabler for the automation of driving tasks in trucks.

Valeo is also unveiling a number of onboard safety systems, including Valeo Driver Monitoring, which can identify the driver, monitor his or her attentiveness and quickly ensure good control of the vehicle when it switches from automated to manual driving mode.

Lastly, since vehicle sharing is already common practice in the road transportation sector, Valeo is exhibiting a unique digital solution based on its virtual smartkey system (Valeo InBlue[®]) to make sharing even easier, with an unprecedented level of security.

Valeo is an automotive supplier, partner to all automakers worldwide. As a technology company, Valeo proposes innovative products and systems that contribute to the reduction of CO₂ emissions and to the development of intuitive driving. In 2017, the Group generated sales of 18.5 billion euros and invested 12% of its original equipment sales in Research and Development. Valeo has 185 plants, 20 research centers, 36 development centers and 15 distribution platforms, and at June 30, 2018, employs 115,000 people in 33 countries worldwide. Valeo is listed on the Paris stock exchange and is a member of the CAC 40 index.
