

## Valeo ClimSpray™, the disinfectant solution for vehicle cabins, receives “virucide” certification, effective in particular against coronaviruses

**Paris, June 12, 2020** – The solution used in Valeo ClimSpray™ has recently received certification from an independent medical laboratory for its compliance with European biocide efficacy standards.\* The product, which disinfects and purifies vehicle cabins, has the ability to neutralize viruses (including coronaviruses), bacteria and fungi.

Valeo ClimSpray™ comes as a spray that can be used by anyone. It has an automatic effect: once sprayed in the cabin, it disinfects the vehicle’s interior in 15 minutes flat. The product has the dual advantage of not only preventing the spread of infectious microbes at the source, but also releasing a pleasant fragrance. Valeo ClimSpray™ is suitable for use on both plastic and rubber and does not leave any traces or stains behind.\*\*

Since helping improve air quality is a key innovation focus for Valeo, the Group also offers a second product, Valeo ClimPur™, designed for use by professionals in vehicle maintenance and servicing. This product is diffused via the vehicle’s ventilation circuit to purify the air conditioning system. It cleans, disinfects and protects, while also preventing corrosion from evaporation, eliminating unpleasant odors and filling the cabin with a pleasant scent.

Valeo ClimPur™’s unique microscopic formulation and its ultra-fine droplets mean that the product is distributed evenly, ensuring a steady flow through the air conditioning circuit. The product is non-flammable, which guarantees safety for operators in vehicle workshops.

Valeo has also developed a range of comprehensive solutions for the end-to-end treatment of vehicles’ ventilation circuits. Installing Valeo’s cabin filters in a vehicle creates a powerful shield against pollutants, pathogens, pollen and allergens. Valeo’s offering of cabin filters comprises several ranges, the latest of which can block up to 97% of microparticles of 0.5 µm and above while delivering 99% efficacy against contaminants and viruses (tested according to ISO 18184).

---

\* Product compliant with EN14476+A2 (proven to be effective against coronavirus-type viruses), EN1040, EN1275, EN1650, EN1276 and EN13697.

\*\* Valeo ClimSpray™ is available from specialized automotive parts distributors for around €20 including VAT (professionals are free to set retail prices).

Valeo is an automotive supplier and partner to all automakers worldwide. As a technology company, Valeo proposes innovative products and systems that contribute to the reduction of CO2 emissions and to the development of intuitive driving. In 2019, the Group generated sales of 19.2 billion euros and invested 13% of its original equipment sales in Research and Development. At December 31, 2019, Valeo had 191 plants, 20 research centers, 39 development centers and 15 distribution platforms, and employed 114,700 people in 33 countries worldwide. Valeo is listed on the Paris Stock Exchange.
