Valeo Japan participates in Dynamic Map Large Scale Demonstration Experiment in the framework of Strategic Innovation Promotion Program

Valeo Japan participates in the Dynamic Map large scale demonstration experiment in the framework of Strategic Innovation Promotion (SIP) Program Automated driving system led by the Cabinet Office of the Government of Japan in collaboration with related ministries and organizations from 2018 fiscal year. It is the first time for Valeo Japan to participate in the Automated Driving project led by Japanese Government.

In the Dynamic Map large scale demonstration experiment is conducted for the validation of map update, the distribution of dynamic information and the linkage, the utilization of dynamic maps linking dynamic information by participants, and to promote international collaborative activities through exchange and discussions with related organizations in Japan and overseas.

By supporting the Dynamic High Definition Map data improvement in Japan, Valeo will collaborate with Japanese government, industry and academia to develop High Definition Map, which is identified as one of the key element for the deployment of automated driving. Valeo Japan has Tsukuba Techno Center in Ibaraki Prefecture, where it develops technologies for Automated Driving and conducts various experiments by using its test vehicles. Having a wide portfolio of sensors, hardware and software and rich expertise, Valeo will contribute to improve and facilitate Japanese Dynamic map solutions.

About Valeo in Japan
Valeo marked the first step in Japan by establishing a Japanese branch in December 1985. Japan, homeland of leading automotive manufacturers, is a key strategic country for Valeo Group. Valeo is a leading global automotive supplier with deep-rooted footprint in Japan through 17 plants, 7 R&D centers and about 5,800 employees. Valeo Japan is Group’s center stage for Research and Development, Manufacturing, Business Development and customer-care for the Japanese carmakers in Japan and worldwide.

Valeo is an automotive supplier, partner to all automakers worldwide. As a technology company, Valeo proposes innovative products and systems that contribute to the reduction of CO₂ emissions and to the development of intuitive driving. In 2017, the Group generated sales of 18.6 billion euros and invested 12% of its original equipment sales in Research and Development. At December 31, 2017, Valeo has 184 plants, 20 research centers, 35 development centers and 15 distribution platforms, and employs 111,600 people in 33 countries worldwide. Valeo is listed on the Paris stock exchange and is a member of the CAC 40 index.
