

## **VALEO OTOMOTIV SANAYI VE TIC A.S ENVIRONMENT POLICY**

Valeo Bursa A.Ş., which operates in the production and development of clutch, wiper, air conditioning, electrical systems (alternator) and related parts; It is everyone's primary duty to ensure continuous improvement in order to increase environmental performance in line with the purpose and context of our company.

In accordance with the ISO 14001 environmental management system standard, the company management and all employees undertake to comply with the following issues;

- To determine, control and reduce environmental impacts that may arise from our activities,
- To comply with the relevant legal and other requirements and to fulfill the requests of the Valeo Group Rules,
- In the selection of products and new processes, to choose the ones that are harmless to the environment and low risk as possible,
- To use energy and natural resources economically,
- To prevent pollution by extending the reuse and recovery of materials used in all departments and reducing the amount of waste,
- To increase environmental awareness by educating all our employees as well as the subcontractors and manufacturers we work with,
- To ensure the participation of all employees by using internal and external communication resources effectively in order to ensure and maintain transparency in environmental activities in our company.

I wish you success in your work, believing that everyone will fulfill their duty in these matters.
